Enactor on Demand

Enactor on Demand unlocks the perfect omnichannel store solution for retailers of all sizes looking to deploy new features into stores quickly and easily, without large up-front investment.

More than simply a POS, Enactor is a combination of mobile POS, self-checkout, order management, store inventory management and clienteling, all managed from a single platform. The cloud enabled solution is built with a flow-based architecture and distinctive microservices framework, giving retailers the flexibility to choose from a suite of out-of-the-box features and also the freedom to extend the front end themselves and add their own applications easily.

**More benefits

Why choose **Enactor on Demand**?

- ✓ **Resilient & secure**
Get access in hours to a secure system that runs in your own trusted, virtual private cloud
- ✓ **Fast deployment**
Deploy anywhere across any device in AWS and Azure in minutes, and to your stores in just weeks
- ✓ **Low start up costs**
Our quarterly payments option removes the burden of large upfront costs for hardware, IT experts and systems
- ✓ **Easy set up**
Easy to configure and compatible with operating systems and databases
- ✓ **Reusable components**
Save money in customisation with over 200 Enactor Headless Microservices
- ✓ **Easy & intuitive integration**
Extend services to order and inventory management systems with REST APIs such as basket, promotions, products, prices, orders and more
- ✓ **Extend the front-end yourself**
Use our flow-based development tools, React UI or our commerce APIs to extend or own the front end across any touchpoint
- ✓ **Scalable**
Provide your customers with a consistent and scalable “always-on” digital experience that meets your business needs
- ✓ **Global fiscalisation**
Supporting regional languages, currencies and tax rules

**Join the retailers who
are winning customer loyalty fast**
